

AERO Paint Restorer

Description

Highly effective combination of polish and wax – an effortless method of freshening up slightly weathered aircraft paintwork. Removes typical residues from flying in one go and puts a fresh shine on all painted surfaces. Repels rain and dirt for prolonged periods and therefore improves resistance to weathering, thus preserving the value of the aircraft.

Properties

- easy removal of weathered paint layers
- easy to use
- protects the paintwork against aggressive effects from the weather and the environment
- Tested for UV at altitude
- silicone-free

Technical data

Color / appearance	grün / green
Form	flüssig / liquid
Odor	charakteristisch / characteristic
Base	Wachse, Silikone, Polymere, Mikro-Polierpigmente / waxes/ silicones/ polymers/ micro-polishing pigments
pH value	6,83
Density	0,98 g/cm ³
Flash point	> 65 °C
Viscosity at 40 °C	> 7 mm ² /s

Areas of application

Polish specially developed for use on aircraft paintwork. Also suitable for GFRP and CFRP aircraft (including gliders). Specially formulated for the needs of general aviation.

Application

First, the surfaces to be treated must be thoroughly cleaned. Shake the product well before use and pour onto a soft rag, polishing cloth or sponge. Apply thinly and evenly using light pressure and circular motions. Only treat one section at a time. Then simply wipe off polishing agent residues with a soft clean cloth (preferably a microfiber cloth). Do not use under direct heat or on hot paint surfaces. Suitable for manual and mechanical treatment.

Available pack sizes

500 ml Can plastic	5901
	D-GB-F
